

Requirements: Microsoft Windows VISTA and user-id HANaccount

You will find the software (and this documentation) on www.han.nl/insite/ict/english. From here choose:
Service → Facilities/Manuals → HANwireless → Manuals and software wireless networking and printing

The installation process is straightforward: Click on 'SecureW2_EAP_Suite_HAN'. In the 'File Download' box click Run.
After installation system has to be rebooted!

1. User Account Control pops up with a warning. Select 'Allow'.
2. Select your preferred language. 'English', 'Nederlands' or Then click OK.
3. Welcome message Information. Click "Next".
4. License Agreement. Click on "I Agree".
5. 'Choose Components EAP-TTLS' (is default). Just click on "Install".

6. Click "Finish". System reboots and SecureW2 is installed.

7. After reboot you see in lower-right corner a popup (wait a few seconds). Click on this popup and a login window appears.

8. SecureW2 login window: fill in your HANaccount and password.
9. Don't forget to check the 'Save user credentials' option!
10. After a moment the connection is setup and ready for use. Enjoy.

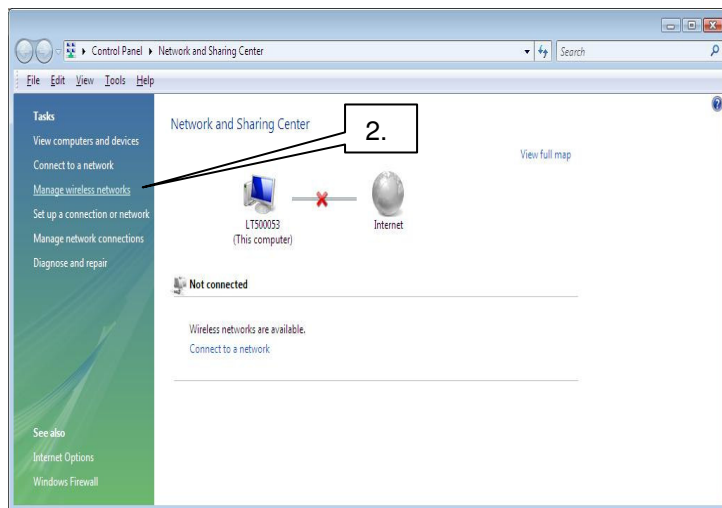

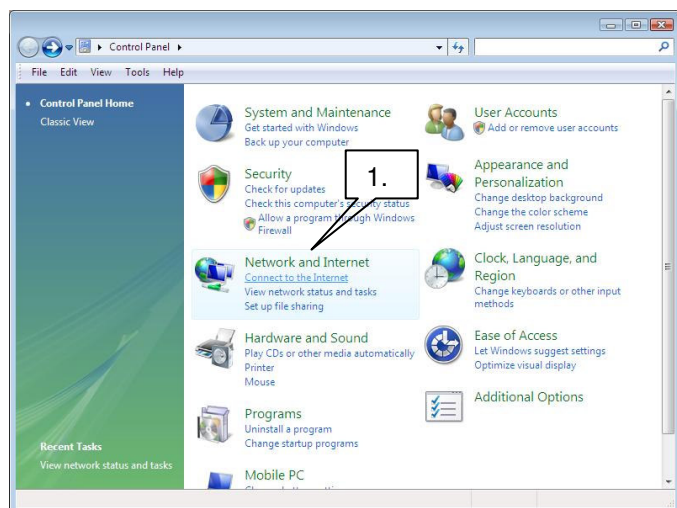

Next part is only for problem solving:

1. If the network icon appears with a red cross then right-click it. (taskbar lower-right corner)

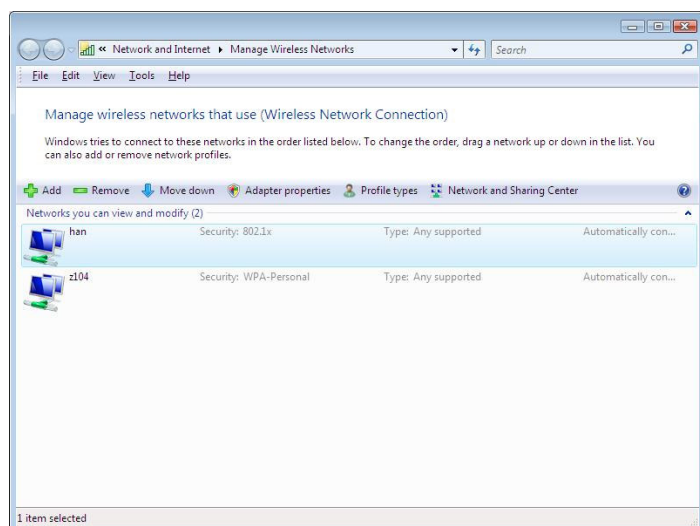

2. 'Connect to a network'.
3. Select 'han' and choose "Connect".
4. repeat (as described above) steps 7, 8 and 9.

Check your HANaccount and password and configuration. Perform next check.

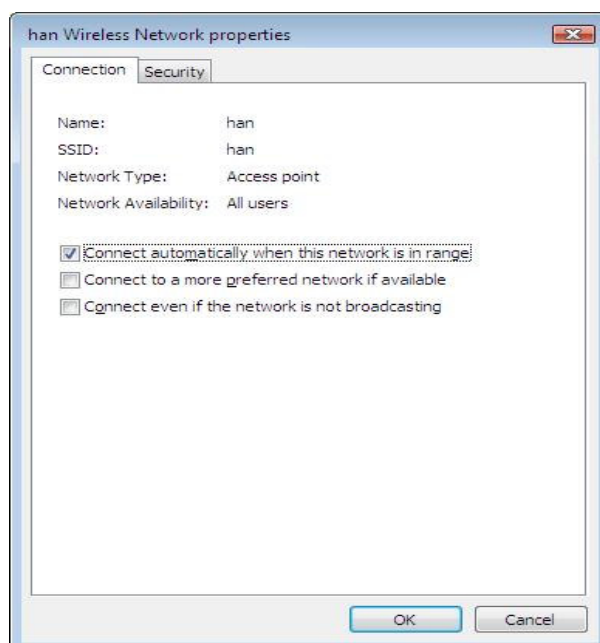

1. Go from Start → Control Panel (control Panel Home) 'View network status and tasks'. [(Classic view) 'Network and Sharing Center]

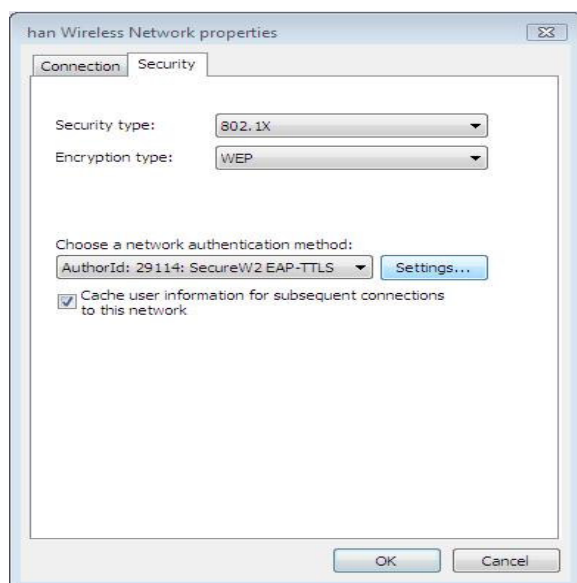

2. Select 'Manage wireless networks'.

3. Select 'han' -> right-click 'han'. → select "Properties".

4. Check tick 'Connect automatically...' un-tick others → choose -tab- 'Security'.

5. Check 'Security type:' 802.1X and 'Encryption:' WEP → Select 'Settings...'.
6. User Account Control pops up with warning. Choose 'Allow'

7. Select Profile 'Han Wireless Connection' → 'Configure'
8. Check next five SecureW2 screenshots....

9. -tab- "User account → Fill in your HANaccount and password
10. Un-tick 'Prompt user for credentials'
11. Advanced knop

12. Close all SecureW2 configuration: Click OK→OK→OK.

Optional Information:

- **If you change your password be sure to change it in secureW2 also! Start with first step Problem solving.**
- After a few seconds the wireless connection will be established. If not, then check your password or try the procedure once again. If all fails see your local helpdesk.
- keep your Laptop OS and virusscanner up to date!
- Uninstall additional software that came with your wireless network card. Only install the wireless network drivers.
- Some wireless network-cards have a power saving feature. This may cause wireless connection problems. To prevent this you may want to check and modify this:
Control Panel (Home) → Mobile PC → Power Options → Change battery settings
→ If the powerplan is 'Balanced' or 'High performance' then you have nothing to do.
→ If the powerplan is 'Power saver' is chosen then select 'Change plan settings' →
Select 'Change advanced power settings' → select 'Wireless Adapter Settings' → Select
→ On battery: 'Maximum Performance'
→ Plugged in: 'Maximum Performance'
