Author : admin

Some weeks ago, I was looking for some extra applications for my Mobile (Nokia 9300i). After some time spend in Google I was lucky to find a direct link to an extensive collection of games and applications for Nokia Communicator Based mobiles, most of the packaged applications work like a charm. However some of the applications cracks, doesn't work even though this is just a tiny number of all the applications in the archive.

Somebody out there did a great job in compiling this nice cracked apps collection.

Here is a list of all the Nokia Communicator Software included in the "ASA2005 Nokia Appz n Gamez" collection.

most of the applications are a must have

ones on your mobile. The overall of apps in the archive is 103. For further information about
each of the apps check in google.

Originally I've downloaded the archive above from rapidshare, I give or regard no any liability about how
and why,

you're going to use this applications. What I did is simply I've mirrored the archive that is also available
from rapidshare.

Hopefully this apps would enrich your smartphone experience just like it did mine :)
