Author : admin

Alex, just passed me by few funny videos, with "**animals singing death metal**"

### Death Metal Singing Rooster

This Rooster, should definitely contact **Six Feet Under (SFU)** 's vocalist - Chris Barnes for a solo album ;)

I guess this Camel should start innovative *metal music fork* to **Grind Core** or **Noise Core metal** genre sub-division :)

I'm sure you never imagined the donkey could be an awesome **Metal singer**, Well believe it or not it is a fact *the donkey has a talent* :)

**This dog is quite experienced in Death Metal vocalist stage behaviour ;)**

There is plenty of other Metal singing animals in Youtube, for more laugh check the related videos.  
**Enjoy ! :)**
