

Life was easier when Blackberry and Apple were just fruits

Author : admin

Sad but true fact **Life was much easier when BlackBerry and Apple were just fruits!**.

I don't know about others but I have difficulties to adjust my body to the fast pace life has taken. Life would be easy and more fun without all this technology. Now even going to a pub you can't escape the "doom" of technology. If the tech hype continues the way it does or something drastic doesn't happen I guess all people on earth will get completely crazy ...

I thought about how this techno-mambo jumbo can be stopped on a wide scale and the only idea I have is a weapon that blocks all tech equipment world-wide. I hope someone will develop it soon and press the destroy button SOON ! :)
