

## **Play Ascii Games on Pc-freak - Get back memories of the ASCII times**

**Author :** admin

I was considering starting a new "ascii games service". Thus I've created a user `play` to provide a bunch of nice FreeBSD based ascii games able to be played directly through SSH (For all lacking a nice tty compatible client like gnome-terminal), try with [PuTTY](#) . To play the games:

telnet or ssh to: [ascii-games.pc-freak.net](http://ascii-games.pc-freak.net)

login with user: play

password: playnow

Enjoy!
