Ever thought about playing your favourite good old arcade games on Nokia 9300i?

I did ! It took me a while until I can play my favourite games from my youth, however I was lucky to make it work.

1. In order to play the Sega games I have to use a Picodrive (a sega mega drive emulator who was originally written for Risc OS) and then was ported for our shiny mobile phones. The port that worked on my Nokia 9300i was [picodrives80s90_0_5_latest_04-06-2006.sis](#)

I have to admit it was a real pain in the ass to find the working version of Picodrive for the Nokia 9300i mobile. So I hope youâ€™ll be more happy than me simply following the picodrive download location provided in the download link above.

2. After having the properly installed version of picodrive on your Nokia.
create a folder (preferably) on your memory card. Assure yourself the new created folder is called **pdgames**.

3. Download some Sega Genesis roms from [romnation.net](#) or any other large Sega Genesis rom archive on the Internet.

4. Top 50 WORKING (recommended to play games) for the picodrive emulator are as follows:
(N.B.! Originally the list of games was taken from [allaboutsymbianâ€™s website forums](#) 1. Altered Beast 2. California Games 3. Cannon Fodder 4. Columns 5. Coolspot 6. Even though the list contains plenty of wonderful sega games. Not all the games forementioned were suitable for my personal liking.

Thus Iâ€™ve selected a custom list of games which I like more:

The roms Iâ€™ve installed on my Nokia 9300i, Iâ€™ve bundled in a small archive that can be downloaded [here, my picodrive_nokia9300i_favourite_roms_collection](#).
