

## The Advantages Of Using Free Software Instead Of Proprietary One

**Author :** admin

I almost forgot. We had to do a presentation in the College on a free theme I choosed "The Advantages Of Using Free Software Instead Of Proprietary One" from this link you can check was all about [Free Software Advantages Presentation](#) .

The presentation went smoothly as a whole the only problem was that my colleagues had no really idea what is all this about. The good thing is that the Business Communication teacher said the theme is really interesting and likes what I did. God was merciful also to give me a peace during the whole presentation thing.

Thank you LORD.

There is also a plain text version of the presentation which can be seen [here](#) END"
